VAGAL MANEUVERS

Date: May 31, 2012

Page 1 of 1

Vagal Maneuvers

Purpose: Outline utilization of the Valsalva vagal maneuver.

Indications

1. Narrow complex tachycardia. See **Narrow Complex Tachycardia** and **Pediatric Narrow Complex Tachycardia** protocols.

Contraindications

1. Patient unable to attempt the maneuver.

Equipment Needed

1. ECG Monitor

Pre-Medical Control

PARAMEDIC

1. Ensure that patient has oxygen, and is on a cardiac monitor. Run ECG strip during procedure.
2. Instruct the patient to cough forcefully several times, if this is ineffective:
 - A. Explain Valsalva's Maneuver to the patient.
 - B. Have patient take a deep breath and bear down.

Documentation

1. Results of initial assessment, indications for procedure and results of maneuver.
