# Michigan General Procedures VAGAL MANEUVERS

Date: May 31, 2012 Page 1 of 1

## Vagal Maneuvers

Purpose: Outline utilization of the Valsalva vagal maneuver.

## **Indications**

1. Narrow complex tachycardia. See Narrow Complex Tachycardia and Pediatric Narrow Complex Tachycardia protocols.

### **Contraindications**

1. Patient unable to attempt the maneuver.

## **Equipment Needed**

1. ECG Monitor

## **Pre-Medical Control**

### **PARAMEDIC**

- 1. Ensure that patient has oxygen, and is on a cardiac monitor. Run ECG strip during procedure.
- 2. Instruct the patient to cough forcefully several times, if this is ineffective:
  - A. Explain Valsalva's Maneuver to the patient.
  - B. Have patient take a deep breath and bear down.

#### **Documentation**

1. Results of initial assessment, indications for procedure and results of maneuver.
